Art Unit: 3641

1. The disclosure is objected to because of the following informalities: The term "pre-fragmented" in both the claims and disclosure is misdescriptive. If the arrangement is indeed pre-fragmented, then it is in pieces. It is believed that applicant intends to state that it is scored, although that is not what is taught in the specification.

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-6, 8-14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Walters, newly applied.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walters in view of Rheinmetall '463. Walters teaches internal slots (claim 8), while Rheinmetall teaches external slots. This adaptation would be obvious to a routineer in the art utilizing the two references.

Art Unit: 3641

6. Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walters in view of either Rheinmetall reference. The German references teach shaped charges containing "pre-fragmentation" points. It would be obvious to use a plurality of these in a perforating string arrangement.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
